-

1. EXECUTIVE SUMMARY

Vision

Become the global standard for SME card payment reconciliation — the “QuickBooks” of payment clearing.

Mission

Eliminate the manual work, errors, and cash flow uncertainty that SMEs face when reconciling card collections across multiple banks, acquirers, and TPV terminals.

Unique Value Proposition

“Know exactly what cleared, what didn’t, and when your money will arrive — every morning, automatically.”

Target Markets (Priority Order)

1. **Spain + Portugal** (Iberian Peninsula) — Home market, PSD2 mature, RedSys/CECA dominant
2. **France + Italy** — Large SME markets, similar TPV infrastructure
3. **UK + Ireland** — Open Banking mature, English-speaking, Stripe/Adyen heavy
4. **Germany + Netherlands** — DACH market, high digital adoption
5. **Latin America** (Mexico, Colombia, Brazil) — High growth, emerging Open Banking
6. **Southeast Asia** (Singapore, Philippines) — Fintech-friendly regulations
7. **North America** (US, Canada) — Largest market, but most competitive

2. MARKET ANALYSIS & OPPORTUNITY

Total Addressable Market (TAM)

Region	SMEs with Card Payments	Est. TAM (Annual)	Serviceable (SAM)
EU-27	18.5 million	€4.2B	€840M (20%)
UK	5.5 million	€1.1B	€220M
LATAM	12 million	€1.8B	€360M
North America	32 million	€6.4B	€1.3B
Global	~68M	€13.5B	€2.7B

Assumption: Average SME pays €200-500/year for reconciliation tools; 20% serviceable with our initial feature set

Market Drivers

- **Card payment volume growing 12% CAGR globally** — more transactions = more reconciliation pain
- **Multi-acquirer adoption** — SMEs use 2-3 TPV providers (RedSys + Stripe + SumUp)
- **Real-time settlement expectations** — Businesses want to know when money arrives
- **Accountant shortage** — Automation replaces manual reconciliation work
- **Open Banking / PSD2 mandates** — Governments forcing banks to open APIs

Pain Points (Validated by Research)

1. **Time waste:** 5-10 hours/week on manual reconciliation
2. **Cash flow blindness:** Don't know when card sales will hit the bank
3. **Fee opacity:** Can't verify if acquirer fees are correct
4. **Error detection delay:** Discrepancies found weeks later
5. **Multi-bank chaos:** Juggling 3-5 bank portals and TPV backends

3. COMPETITIVE LANDSCAPE

Direct Competitors

Competitor	Strengths	Weaknesses	Our Advantage
AutoEntry (Sage)	Strong brand, OCR	No TPV integration, no cash flow forecast	Native TPV + bank + 3-way match
Dext (Receipt Bank)	Receipt capture	Not designed for card clearing	Purpose-built for payment reconciliation
Synder	E-commerce focus	Only online payments (Stripe, PayPal)	Covers physical TPV terminals too

Table 2 – continued

Competitor	Strengths	Weaknesses	Our Advantage
ReconArt	Enterprise focus	Expensive, complex, slow implementation	SME-focused, 5-minute setup
TreasurySpring	Cash management	UK-only, no reconciliation	We do both reconciliation + treasury
Custom Excel	Free, familiar	Error-prone, manual, no automation	Automated, accurate, scalable

Indirect Competitors

- **Banking apps** (some offer basic categorization)
- **Accounting software** (QuickBooks, Xero have basic bank feeds)
- **ERP modules** (SAP, Oracle — enterprise only)

Competitive Moat Strategy

1. **Data network effects:** More users = better matching accuracy via ML
2. **Integration depth:** Native TPV APIs (not just bank feeds)
3. **Local expertise:** Per-country fee structures, settlement rules, holidays
4. **Speed:** Morning report in <2 minutes after reconciliation

4. REGULATORY ROADMAP BY REGION

Phase 1: European Union (Spain, Portugal, France, Italy, Germany, Netherlands)

PSD2 (Revised Payment Services Directive)

- **Status:** Fully implemented (2019)
- **Requirements:**
 - Must register as **AISP** (Account Information Service Provider) OR partner with licensed AISP
 - **Recommendation:** Partner with licensed AISP (Nordigen, Tink, TrueLayer) — €50K-200K savings vs. direct license
 - Strong Customer Authentication (SCA) — handled by AISP partner
 - 90-day consent re-authentication — auto-reminders in our app
- **Data handling:** GDPR applies (see below)
- **Liability:** AISP partner bears regulatory liability for bank connections

GDPR (General Data Protection Regulation)

- **Requirements:**
 - Lawful basis for processing: **Legitimate Interest** (reconciliation is core business function)
 - Data minimization: Only store last 4 digits of card numbers
 - Right to erasure: 30-day deletion endpoint
 - Data portability: JSON export of all tenant data
 - Breach notification: 72 hours to DPA
 - DPO required if >250 employees or high-risk processing (unlikely for us initially)
- **Action items:**

- Privacy Policy drafted by EU lawyer
- Data Processing Agreements with all subprocessors (AWS, Auth0, banking APIs)
- Register with Spanish AEPD (or local DPA of HQ country)
- Implement cookie consent (if using analytics)

PCI-DSS (Payment Card Industry Data Security Standard)

- **Scope:** Since we only store last 4 digits + amounts (no full PAN, no CVV), we are **SAQ-A eligible** (lowest level)
- **Requirements:**
 - Secure network (AWS VPC)
 - Encryption in transit (TLS 1.3) and at rest (AES-256)
 - Access control (RBAC)
 - Monitoring and logging
 - Quarterly vulnerability scans
- **Action items:**
 - Complete SAQ-A self-assessment
 - Quarterly scans by ASV (Approved Scanning Vendor)
 - Never store full card numbers — validate in code reviews

Phase 2: United Kingdom

Open Banking (OBIE)

- **Status:** Mature, 7+ million users
- **Requirements:** Similar to PSD2 but UK-specific standards
- **Partners:** Use OBIE-licensed providers (TrueLayer, Yapily, Plaid UK)
- **Post-Brexit:** GDPR replaced by UK GDPR (nearly identical)

FCA Registration

- If offering payment services directly: FCA authorization required
- **Recommendation:** Partner with licensed provider (avoid direct FCA registration initially)

Phase 3: Latin America

Mexico (Fintech Law 2018)

- **Regulator:** CNBV (Comisión Nacional Bancaria y de Valores)
- **Requirements:** Registration as IFPE (Institución de Fondos de Pago Electrónico) if holding funds
- **Our model:** We don't hold funds (pure information service) → lighter regulation
- **Open Banking:** Voluntary standard (Codi, Open Finance) — growing but not mandated

Brazil (Pix + Open Banking)

- **Pix:** Instant payment system (mandatory for banks)
- **Open Banking:** Phased implementation (2021-2024)
- **Regulator:** Banco Central do Brasil
- **Opportunity:** Huge SME market, emerging reconciliation needs

Colombia

- **Open Banking:** Regulatory sandbox active
- **Regulator:** Superintendencia Financiera
- **Strategy:** Partner with local fintech (e.g., Belvo, which covers LATAM)

Phase 4: North America

United States

- **No federal Open Banking mandate** (unlike EU)
- **CFPB** (Consumer Financial Protection Bureau) exploring rules (2024-2025)
- **Current state:** Screen scraping (unreliable) or direct bank agreements
- **Best path:** Plaid (covers 12,000+ US banks via screen scraping + direct APIs)
- **State laws:** California CCPA (privacy), NY DFS cybersecurity rules
- **SOX compliance:** Only if you go public (not relevant initially)

Canada

- **Consumer-Driven Banking Framework:** Rolling out 2024-2026
- **Regulator:** Department of Finance Canada
- **Strategy:** Wait for framework maturity or use Plaid Canada

Phase 5: Southeast Asia

Singapore

- **MAS** (Monetary Authority of Singapore) — fintech-friendly
- **Digital banking licenses** issued — strong API ecosystem
- **Strategy:** Partner with SGFinDex (national financial data platform)

Philippines

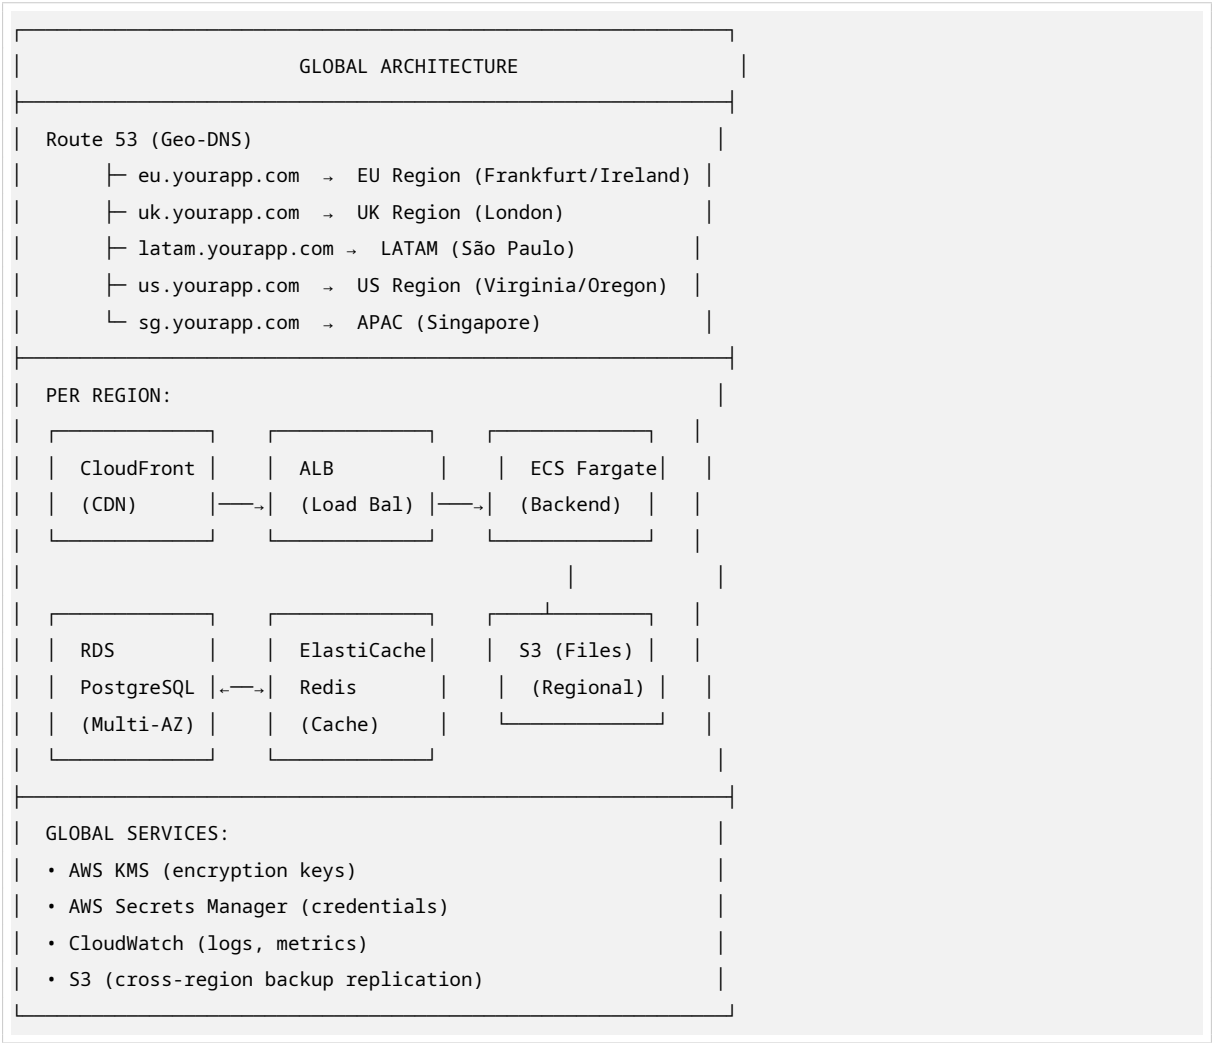

- **Open Finance Framework:** BSP (Bangko Sentral ng Pilipinas) leading
- **High remittance volume** — reconciliation pain for money changers/SMEs

Regulatory Compliance Matrix

Region	Key Regulation	License Needed?	Partner Strategy	Cost Estimate
EU	PSD2 + GDPR	AISP (if direct)	Partner with Nordigen/ Tink	€0 (partner bears cost)
UK	Open Banking + UK GDPR	AISP (if direct)	Partner with TrueLayer/ Plaid	£0 (partner bears cost)
Mexico	Fintech Law	IFPE (if holding funds)	Don’ t hold funds → info service only	\$0
Brazil	Open Banking + Pix	None (info service)	Partner with Belvo/Plaid	\$0
US	CCPA (CA) + state laws	None (info service)	Use Plaid	\$0-500/month
Singapore	MAS guidelines	None (info service)	Partner with SGFinDex	S\$0

5. GLOBAL TECHNICAL ARCHITECTURE

Multi-Region Deployment

Data Residency Requirements

Region	Data Residency Required?	Strategy
EU	Yes (GDPR Article 44)	Primary DB in EU; backups in EU only
UK	Yes (UK GDPR)	Primary DB in UK; mirror from EU if needed
LATAM	Partial (Mexico requires local storage)	Primary DB in São Paulo for LATAM tenants
US	No (but customers prefer it)	Primary DB in US for US tenants
Singapore	Yes (MAS guidelines)	Primary DB in Singapore for APAC tenants

Multi-Currency Support

```
# Core currency handling
class CurrencyService:
    SUPPORTED_CURRENCIES = ["EUR", "USD", "GBP", "MXN", "BRL", "COP", "SGD", "PHP"]

    def convert(self, amount: Decimal, from_currency: str, to_currency: str, date: date) -> Decimal:
        # Use ECB reference rates (EU), XE.com, or local central bank APIs
        pass

    def format(self, amount: Decimal, currency: str, locale: str) -> str:
        # €1.234,56 (ES), $1,234.56 (US), R$ 1.234,56 (BR)
        pass
```

Localization (i18n)

Component	Strategy
UI Language	React-i18next with JSON translation files
Date formats	Locale-aware (DD/MM/YYYY vs MM/DD/YYYY)
Number formats	Locale-aware (comma vs period for decimals)
Time zones	Per-tenant timezone; all storage in UTC
Bank holidays	Per-country holiday calendar (affects settlement dates)
Initial languages	Spanish, English, Portuguese, French, German, Italian

6. GO-TO-MARKET STRATEGY BY PHASE

Phase 1: Spain + Portugal (Months 1-6 after launch)

Why First?

- Home market advantage — local knowledge, language, network
- RedSys + CECA dominate (standardized infrastructure)
- PSD2 mature (easy bank connections via Nordigen)
- SME density high (3.2M SMEs in Spain alone)

Channels

- **Direct sales:** LinkedIn outreach to finance directors of retail chains
- **Accountant partnerships:** Offer 30% commission for referrals
- **TPV provider partnerships:** RedSys resellers, SumUp, Stripe
- **Content marketing:** Blog in Spanish about reconciliation best practices
- **SEO:** Target “conciliación bancaria”, “cuadrar TPV”, “liquidación tarjetas”

Pricing (Spain/Portugal)

- **Free:** 1 institution, 500 transactions/month
- **Pro:** €39/month — 5 institutions, unlimited, API, email reports
- **Business:** €99/month — Unlimited, SLA, phone support, custom fees
- **Enterprise:** €299/month — White-label, dedicated CSM, custom integrations

Phase 2: France + Italy (Months 7-12)

Entry Strategy

- **Hire local country manager** (remote, native speaker)
- **Translate platform** (French, Italian)
- **Local bank integrations:** BNP Paribas, Société Générale, Intesa Sanpaolo
- **Local TPV knowledge:** Ingenico, Worldline in France; Nexi in Italy
- **Local compliance:** Register with CNIL (France) / Garante Privacy (Italy)

Pricing (France/Italy)

- **Pro:** €49/month (slight premium vs Spain)
- **Business:** €119/month
- **Enterprise:** €349/month

Phase 3: UK + Ireland (Months 13-18)

Entry Strategy

- **English language** — no translation needed
- **Open Banking maturity** — easiest bank integrations
- **Stripe/Adyen heavy** — strong API ecosystem
- **Partner with UK accounting bodies:** ICAEW, ACCA
- **Attend Accountex London** (accounting trade show)

Pricing (UK)

- **Pro:** £45/month
- **Business:** £95/month
- **Enterprise:** £295/month

Phase 4: DACH (Germany, Austria, Switzerland) (Months 19-24)

Entry Strategy

- **German translation** (essential — Germans expect native language)
- **Local bank integrations:** Deutsche Bank, Commerzbank, Sparkasse
- **GDPR strictness:** Highest in EU — extra compliance focus
- **Hire German-speaking support**
- **Partner with DATEV** (dominant accounting software in Germany)

Phase 5: Latin America (Months 25-36)

Entry Strategy

- **Mexico first:** Largest Spanish-speaking market, fintech-friendly
- **Partner with Belvo** (covers Mexico, Colombia, Brazil)

- **Local payment methods:** Oxxo Pay, SPEI (Mexico); Pix (Brazil)
- **Hire LATAM country manager** (Mexico City or São Paulo)
- **Pricing:** Lower ARPU, higher volume — €19-29/month for Pro

Phase 6: North America (Months 36-48)

Entry Strategy

- **US is the prize but hardest** — most competitive market
- **Differentiation:** Focus on multi-acquirer reconciliation (Stripe + Square + physical TPV)
- **Partner with US accounting firms:** CPA firms, QuickBooks ProAdvisors
- **Pricing:** \$49/month Pro, \$129 Business
- **Regulatory:** State-by-state compliance (start with CA, NY, TX)

7. LOCALIZATION & MULTI-CURRENCY

Currency Support Roadmap

Phase	Currencies Added	Markets
1	EUR	Spain, Portugal, France, Italy, Germany, Netherlands
2	GBP	UK, Ireland
3	MXN, BRL, COP	Mexico, Brazil, Colombia
4	USD, CAD	US, Canada
5	SGD, PHP, THB	Singapore, Philippines, Thailand

Fee Localization

Each country has different fee structures:

Country	Typical Debit Fee	Typical Credit Fee	Settlement
Spain	0.30-0.50%	0.70-1.20%	D+1 (debit), D+2 (credit)
France	0.25-0.40%	0.60-1.00%	D+1
UK	0.30-0.50%	0.80-1.50%	D+2
Mexico	1.50-3.50%	2.50-4.50%	D+1 to D+3
Brazil	2.00-4.00%	3.00-5.00%	D+30 (installments common)
US	1.50-2.50%	2.50-3.50%	D+2

Strategy: Pre-configure fee templates per country; users can customize.

Settlement Calendar Localization

Banks don't settle on weekends or holidays. We must maintain per-country holiday calendars:

- Spain: 14 public holidays
- UK: 8 bank holidays
- Mexico: 7-8 public holidays
- Brazil: 11-12 public holidays
- US: 10 federal holidays

Implementation: Integrate holidays Python library + manual curation for bank-specific holidays.

8. PARTNERSHIP STRATEGY

Banking-as-a-Service Partners

Partner	Coverage	Use Case	Cost Model
Nordigen (GoCardless)	EU + UK	Bank account aggregation	Free for data, pay for premium features
Plaid	US, UK, EU, CA	Bank connections + balance checks	Pay-per-use (~\$0.25/connection)
Salt Edge	50+ countries	Global bank coverage	Monthly subscription
Belvo	LATAM	Mexico, Colombia, Brazil	Pay-per-use
Tink	EU + Nordics	Strong in Scandinavia	Enterprise pricing

TPV / Acquirer Partners

Partner	Integration Type	Value Exchange
Stripe	REST API	Co-marketing; they refer merchants needing reconciliation
RedSys	SFTP / API	Reseller partnership; offer our tool to their merchant base
SumUp	API	Integration marketplace listing
Adyen	REST API	Enterprise joint sales
Worldline	API	European market expansion

Accounting Software Partners

Partner	Integration	Strategy
QuickBooks	API	Build “reconciliation” app in their marketplace
Xero	API	Similar marketplace strategy
Sage	API	Enterprise co-selling
DATEV (Germany)	API	Essential for German market entry
Contasimple (Spain)	API	Local Spanish accounting software

Referral Program

- **Accountants:** 30% recurring commission for life
- **TPV resellers:** 20% recurring commission
- **Bank relationship managers:** 15% one-time commission

9. PRICING STRATEGY BY MARKET

Global Pricing Framework

Tier	Spain	France	UK	Mexico	Brazil	US
Free	1 institution, 500 tx	Same	Same	Same	Same	Same
Pro	€39/mo	€49/mo	£45/mo	MXN 399	R\$ 199	49/mo * *Business * €99/mo 499
Enterprise	€299/mo	€349/mo	£295/mo	Custom	Custom	Custom

Pricing Psychology

- **Free tier:** Hook users, demonstrate value, convert to Pro within 30 days
- **Pro tier:** Designed for 80% of paying customers (1-3 TPV terminals)
- **Business tier:** For chains/franchises (5-20 locations)
- **Enterprise:** White-label for banks/acquirers wanting to offer reconciliation to their merchants

Annual Discount

- 2 months free (17% discount) for annual payment
- Reduces churn significantly

Add-Ons (Future)

- **Multi-currency:** +€10/month
- **Advanced forecasting (ML):** +€20/month
- **Priority support:** +€15/month
- **Additional user seats:** +€5/user/month
- **White-label API:** +€100/month

10. COMPLIANCE & SECURITY FRAMEWORK

Security Certifications Roadmap

Certification	Priority	Timeline	Cost	Benefit
SOC 2 Type I	High	Month 12	€15K-30K	Required for US enterprise sales

Table 12 – continued

Certification	Priority	Timeline	Cost	Benefit
SOC 2 Type II	High	Month 18	€25K-50K	Gold standard for SaaS security
ISO 27001	Medium	Month 18	€20K-40K	Global recognition, EU enterprise
PCI-DSS SAQ-A	High	Month 6	€2K-5K	Required for any card data handling
GDPR compliance audit	High	Month 9	€5K-10K	Legal requirement for EU

Security Architecture Principles

1. **Zero Trust:** Every request authenticated, every service verified
2. **Defense in depth:** WAF → ALB → API Gateway → Service → DB
3. **Encryption everywhere:** TLS 1.3 in transit, AES-256 at rest
4. **Least privilege:** Services only access what they need
5. **Audit everything:** All data mutations logged immutably

Incident Response Plan

1. **Detection:** Automated alerts (Sentry + Datadog)
2. **Containment:** Isolate affected tenant(s) within 15 minutes
3. **Investigation:** Forensic analysis within 4 hours
4. **Notification:** Customers within 24 hours (GDPR: 72h to DPA)
5. **Recovery:** Restore from clean backups
6. **Post-mortem:** Public incident report within 72 hours

11. TALENT & TEAM SCALING

Launch Team (Months 0-6)

Role	FTE	Location	Cost/Month
CTO / Lead Developer	1	Remote (Spain)	€6,000
Full-Stack Developer	1	Remote (Spain/Portugal)	€4,000
Frontend Developer	1	Remote (Eastern Europe)	€3,500
DevOps Engineer	0.5	Remote	€2,500
Total	3.5		€16,000/month

Growth Team (Months 7-18)

Role	FTE	When	Cost/Month
Backend Developer (API)	1	Month 7	€4,500
Backend Developer (Integrations)	1	Month 9	€4,500
QA Engineer	1	Month 10	€3,500
Product Manager	1	Month 12	€5,000
Customer Success	1	Month 12	€3,000
Country Manager (France)	1	Month 14	€5,500
Total	8.5		€42,000/month

Scale Team (Months 19-36)

Role	FTE	When
ML Engineer (smart matching)	1	Month 20
Security Engineer	1	Month 22
Sales Development Rep (SDR)	2	Month 24
Country Manager (UK)	1	Month 24
Country Manager (Mexico)	1	Month 30
Total headcount	~15	

Hiring Strategy

- **Technical roles:** Toptal, Arc, local tech communities
- **Commercial roles:** LinkedIn Recruiter, local job boards
- **Culture:** Remote-first, async communication, outcome-based

12. FINANCIAL PROJECTIONS

Revenue Model (SaaS + Usage)

Year	MRR	ARR	Customers	Avg Revenue/ User
Year 1	€5,000	€60,000	150	€33
Year 2	€35,000	€420,000	900	€39
Year 3	€120,000	€1.44M	3,000	€40
Year 4	€350,000	€4.2M	8,000	€44
Year 5	€800,000	€9.6M	16,000	€50

Cost Structure

Category	Year 1	Year 2	Year 3
Personnel	€192K	€504K	€900K
Infrastructure	€8K	€36K	€96K
Banking APIs	€2K	€12K	€48K
Marketing	€24K	€120K	€360K
Compliance/Legal	€15K	€40K	€80K
Total Costs	€241K	€712K	€1.48M

Unit Economics (at scale)

Metric	Target
CAC (Customer Acquisition Cost)	€80-120
LTV (Lifetime Value)	€600-900 (18-24 month retention)
LTV:CAC Ratio	6:1 to 8:1
Gross Margin	85-90% (SaaS economics)
Payback Period	3-4 months
Churn Rate (monthly)	<3%
NRR (Net Revenue Retention)	>110% (upsells + expansion)

Funding Strategy

Round	Timing	Amount	Use of Funds
Pre-seed	Month 0	€100K-200K	MVP development, initial team
Seed	Month 12	€500K-1M	Product-market fit, EU expansion
Series A	Month 24	€3M-5M	Scale team, LATAM + UK launch
Series B	Month 36	€10M-15M	US market entry, ML/AI features

13. RISK MANAGEMENT

Global-Specific Risks

Risk	Probability	Impact	Mitigation
Bank API instability	High	High	Multi-provider strategy (Nordigen + Plaid + Salt Edge); graceful fallback to manual upload

Table 20 – continued

Risk	Probability	Impact	Mitigation
Regulatory rejection	Low	Critical	Partner with licensed entities; legal counsel in each market; never hold customer funds
Currency volatility	Medium	Medium	Price in local currency; hedge major exposures; update pricing quarterly
Local competitor	Medium	Medium	Move fast on first market; build data moat; superior UX; local language support
Data residency breach	Low	Critical	Geo-fenced databases; encryption; regular audits; DPA with all subprocessors
Payment processor lockout	Low	High	Never be dependent on one TPV/bank; maintain manual upload as fallback
Economic downturn	Medium	Medium	Freemium model survives downturns; focus on ROI messaging (“saves 10 hours/week”)
Cyber attack	Medium	Critical	Bug bounty program; penetration testing; incident response plan; cyber insurance

Business Continuity

- **Multi-cloud strategy:** Primary AWS, backup GCP (activate if AWS region fails)
- **Database backups:** Continuous backup to S3 + daily snapshots to different region
- **Code escrow:** Source code escrow agreement for enterprise customers
- **Key person insurance:** For CTO/founders

14. LAUNCH TIMELINE

Master Timeline (36 Months)

Month 1-3		MVP Development (Spain-focused)
Month 4-6		Spain Launch + Product-Market Fit
Month 7-9		France + Italy Launch
Month 10-12		UK + Ireland Launch
Month 13-15		Germany + Netherlands (DACH)
Month 16-18		Seed Round + Scale EU Operations
Month 19-24		LATAM Launch (Mexico → Brazil → Colombia)
Month 25-30		Series A + APAC Exploration
Month 31-36		US Market Entry + Series B Prep

Key Metrics Dashboard (Review Weekly)

Metric	Month 6 Target	Month 12 Target	Month 24 Target
Registered Users	500	3,000	15,000
Paying Customers	50	300	1,500
MRR	€2,000	€12,000	€60,000
Churn Rate	<8%	<5%	<3%
NPS Score	>30	>40	>50
Reconciliation	>90%	>95%	>98%
Accuracy			
Support Response Time	<24h	<4h	<1h
Uptime	99.5%	99.9%	99.95%

APPENDIX A: COMPETITIVE FEATURE MATRIX

Feature	ClearFlow	AutoEntry	Synder	ReconArt	Excel
Bank feed	✔	✔	✔	✔	✖
auto-import					
TPV terminal integration	✔	✖	⚠ (online only)	✔	✖
3-way reconciliation	✔	✖	✖	✔	✖
Fee discrepancy detection	✔	✖	✖	✔	✖
Cash flow forecasting	✔	✖	✖	✔	✖

White-label option	✔	✖	✖	✔	✖

Legend: ✔ Full support, ⚠ Partial, ✖ Not available

APPENDIX B: GLOSSARY

Term	Definition
TPV	Terminal Punto de Venta (POS Terminal) —the card reader device
RedSys	Spanish payment clearing network (Servired)
CECA / 4B	Spanish payment clearing network (alternative to RedSys)
AISP	Account Information Service Provider (PSD2 license type)
CAMT.053	ISO 20022 XML bank statement format (European standard)
MT940	SWIFT bank statement format (older, text-based)
D+1 / D+2	Settlement delay: D+1 means money arrives next business day
PSD2	EU directive forcing banks to open APIs to third parties
Open Banking	UK implementation of PSD2-like principles
Acquirer	Company that processes card payments for merchants
Clearing	Process of transferring funds from card sale to merchant account
Reconciliation	Matching records across multiple systems to ensure consistency
PAN	Primary Account Number (the full card number)
SAQ-A	PCI-DSS Self-Assessment Questionnaire A (lowest compliance level)

Document Version: 1.0 Classification: Confidential — Internal Use Only Last Updated: 2026-08-02 Next Review: Monthly during launch phase, quarterly during scale phase
